Sustainable product design worldwide – Blue Responsibility

01: The worldwide popular Tara tap from Dornbracht is an example for aesthetically appealing sustainability.

Source: Aloys F. Dornbracht GmbH & CO. KG

02: The accessible sink from VARIUScare is certified for Germany and Austria. Due to the small dimensions, however, it is primarily used as a hand wash basin in Germany while it is installed as full sink in Austria.

05: The plate module set Geberit Delta consists of a Duofix installation element for wall toilets, the wall fixing system and the Delta21 flush plate. The installation element allows individual fixing of the concealed installation units – even in tight pipe ducts. The old pipes can still be used.

Source: Geberit Vertriebs GmbH

06: Thanks to the integrated volume control technology, the PCA volume regulator provides constant water volume nearly independent of the pipe pressure.

Source: Neoperl GmbH

07: The United Kingdom has a noticeably higher demand for gloss chrome flush plates, e.g. from the MEPAzero range.

Source: Mepa – Paul und Menden GmbH

08: Bathtubs for two are very important to customers in Asia.
