### Bathroom design through demographic change – Blue Responsibility

01: Thanks to the uniform surface, the Secure Plus non-slip enamelling ensures safe use of the shower without disturbing the harmonious overall appearance.

Source: Franz Kaldewei GmbH & Co. KG

02: The Ideal Grip non-slip shower tray surface protects against slipping and is particularly dirt-resistant.

Source: Ideal Standard GmbH

03: Generous room for movement and features for support and sitting are helpful for users of any age.

Source: Keuco GmbH & Co. KG

04: The shower seat from Keuco offers comfortable seating in the shower. It can simply be folded against the wall when not in use.

05: The toilet can be moved up or down to the desired height before each use with just a press of a button. Continuous adjustment up to eight centimetres is possible.

Source: Viega GmbH & Co. KG

06: The sink element from Viega allows the sink to be continuously height-adjusted by 20 cm. At the press of a button, the unit independently moves up in a range between approximately 70 and 90 centimetres.
