Emergency shelters – Blue Responsibility

01: Geberit offers compact prefabricated bathrooms for fast installation of sanitary facilities in emergency shelters.

Source: Geberit Vertriebs GmbH

02: The bathroom from Geberit is prefabricated at the factory and then delivered to the place of use in modules or as a compact unit. This allows the bathroom to be installed just in time and to be quickly removed when required.

03: The squat toilet from Keramag is available as an individual product or it can be combined with the Geberit in-wall cistern and other Geberit components required for installation.

Source: Keramag – Keramische Werke GmbH

04: Squat toilets are worldwide the most common type of toilet. The squat toilet from Keramag from the Renova Nr. 1 Comfort Pro range meets the special requirements of heavily frequented toilet facilities.
